## What's New In CMB Audio Player?

Nice looking radio streaming application! A very useful application, perfect for anyone who loves listening to music on the go. It may be that on an occasion you only fancy sitting down and watching the waves roll away? Well, that's no problem. And with this application, you can do that. You need to buy the license in order to use the application to its maximum potential. Designed in a clean and light style, RadioSMS is an application that allows you to listen to radio stations with streaming features. With this application, you can download radio stations from the web directly to your mobile device!

---

RadioSMS can play radio stations in 5 different genres such as Pop, Rock, Blues, Top 40, and many others. RadioSMS sports a nice graphical interface with small but very useful features. It allows you to navigate the play list with the toolbar and the display the track titles. You can pause the song, reset the previous position to the beginning or select the next track. Everything is exactly the same from the CD player. You can manage a playlist, find new stations to download, and you can add the station to your favorites. The application works in 2 modes: offline and online. In offline mode, you can save up to 30 stations to your device. That way, you won't need to spend time and bandwidth on

---

streaming Internet radio. And in online mode, the stations will automatically update. The most important thing to mention about the application is that it requires root rights to work on Android 2.3 and up. Installation: Just like any other application, installation is pretty easy and straightforward. Drag and drop the application file onto the home screen and it should open automatically. If you want to, you can decide to uninstall the application and you can do so by clicking the X button at the top right corner of the application. In order to use the application in offline mode, you must have an Internet connection. This application is a money saver if you use it properly.

---

The application itself costs only \$0.99 and you can have several hundred stations stored on your phone. All in all, RadioSMS is a nice application that allows you to manage streaming radio stations and it works as good as any of the others out there. License required: The application is ad supported and that means that you have to buy the license

---

## System Requirements:
